

## **2008 Section 303(d) List of Impaired Waters Requiring a TMDL/Other Strategy**

Presented here is the *Final New York State 2008 Section 303(d) List of Impaired/TMDL Waters*. The list identifies those waters that do not support appropriate uses and that require development of a Total Maximum Daily Load (TMDL) or other restoration strategy. A Response Summary to public comments received on the draft List is also available.

The Federal Clean Water Act requires states to periodically assess and report on the quality of waters in their state. Section 303(d) of the Act also requires states to identify *Impaired Waters*, where specific designated uses are not fully supported. For these Impaired Waters, states must consider the development of a *Total Maximum Daily Load (TMDL)* or other strategy to reduce the input of the specific pollutant(s) that restrict waterbody uses, in order to restore and protect such uses. An outline of the process used to monitor and assess the quality of New York State waters is contained in the New York State *Consolidated Assessment and Listing Methodology (CALM)*. The CALM describes the water quality assessment and Section 303(d) listing process in order to improve the consistency of assessment and listing decisions.

The waterbody listings in the New York State Section 303(d) List are grouped into a number of categories. The various categories, or Parts, of the list are outlined below.

### **Final 2008 Section 303(d) List of Impaired Waters Requiring a TMDL**

#### *Part 1 Individual Waterbody Segments with Impairments Requiring TMDL Development*

These are waters with verified impairments that are expected to be addressed by a segment/pollutant-specific TMDL.

#### *Part 2 Multiple Segment/Categorical Waterbody Impairments Requiring TMDL Development*

These are groups of waters affected by similar causes/sources where a single TMDL may be able to address multiple waters with the same issue. Part 2 is subdivided into:

- a) Waters Impaired by Atmospheric Deposition (acid rain)
- b) Waters Impaired by Fish Consumption Advisories
- c) Waters Impaired by Shellfishing Restrictions

#### *Part 3 Waterbodies Requiring Verification of Impairment or Cause/Pollutant*

These are waters where scheduling of TMDL development may be deferred pending verification of either the suspected impairment or the cause/pollutant related to the impairment. Part 3 is subdivided into:

- a) Waterbody Impairments Requiring Verification
- b) Verified Waterbody Impairments Requiring Verification of Cause/Pollutants
- c) Waterbody Segments Being Addressed Through Other Restoration Measures

Appendix A - Smaller Lakes Impaired by Atmospheric Deposition (Acid Rain)

Appendix B - Listed Waterbodies Not Meeting Dissolved Oxygen Standards

### **Impaired/Delisted Waters NOT Included on the NYS 2008 Section 303(d) List**

Included with but separate from the NYS 2008 Section 303(d) List are a few supplemental listings. Although these waterbody/pollutant listings are not considered to be on the Section 303(d), they provide additional information toward understanding listing decisions and clarify how impairments are considered. Specific supplemental lists are described below.

### **Waterbody Segments Not Listed Because TMDL is Not Necessary**

A list of *Other Impaired Waterbody Segments Not Listed (on 303(d) List) Because Development of a TMDL is Not Necessary* is included with the Section 303(d) List. The purpose of this supplement is to provide a more comprehensive inventory of waters of the state that do not fully support designated uses and that are considered to be impaired.

Section 303(d) of the Clean Water Act stipulates that impaired waters that do not require a TMDL are not to be included on the Section 303(d) List. There are three (3) justifications for not listing an impaired water:

Category 4a - TMDL development is not necessary because a TMDL has already been established for the segment/pollutant.

Category 4b - TMDL is not necessary because other required control measures are expected to result in restoration in a reasonable period of time.

Category 4c - TMDL is not appropriate because the impairment is the result of pollution, rather than a pollutant that can be allocated through a TMDL.

### **2008 Waterbody/Pollutant Delistings**

A separate list of water/pollutant combinations that were included on the previous (2006) Section 303(d) List, but that are NOT included on the 2008 List is also presented. This information provides some linkage and continuity between the previous and proposed new list. The specific reason that the waterbody no longer appears on the List (i.e., delisting action, reassessment, re-segmentation, etc.) is also presented. Some of these waters (those that have been delisted but that remain *Impaired*) also appear on the list of *Other Impaired Waterbody Segments Not Listed Because Development of a TMDL is Not Necessary*.

Water Index Number	Waterbody Name (WI/PWL ID)	County	Type	Class	Cause/Pollutant	Source	Year
--------------------	----------------------------	--------	------	-------	-----------------	--------	------

### 2008 Section 303d List of Impaired Waters

Segments and/or pollutants listed in **Bold Type** are new listings; i.e., they were not included in the previous (2006) Section 303(d) List.

\* Denotes High Priority Waters, scheduled for TMDL/restoration strategy development and submission for approval to USEPA within the next two years.

#### Part 1 - Individual Waterbody Segments with Impairment Requiring TMDL Development

Water Index Number	Waterbody Name (WI/PWL ID)	County	Type	Class	Cause/Pollutant	Source	Year

<sup>8</sup> For the purposes of Section 303(d) listing, this segment includes the lower half-mile of Starch Factory Creek (1201-0067). Starch Factory Creek was assessed overall to have Minor Impacts but supporting uses based on sampling near the mouth. Below the sampling point a CSO is thought to impair uses in the lower half-mile (or 5%) of this 9.2 mile segment. A restoration strategy/TMDL for this portion of this segment will be addressed in the larger CSO strategy/TMDL for the Mohawk River (1201-0093)/Utica Harbor (1201-0228) segments.

<sup>9</sup> A restoration strategy/TMDL for this segment will be developed in conjunction with the Schoharie Reservoir strategy/TMDL.

Other/Smaller Lakes Impaired by Atmospheric Deposition (Acid Rain)...See Appendix A

Previous Section 303(d) Lists included additional small lake waterbodies impacted by atmospheric deposition. Because development of a comprehensive monitoring strategy required limiting the WI/PWL database to lakes 6.4 acres or larger, these smaller lakes are no longer tracked as individual waterbodies in the database. Additionally, some other lakes within a watershed may have been joined together as a single segment, and are no longer tracked individually. In order to accommodate these changes regarding the tracking of waterbodies within the WI/PWL database and to provide continuity between this listing and previous lists that included tracking of the smaller lake waterbodies, a list of *Other/Smaller Lakes Impaired by Atmospheric Deposition* (currently representing 80 lakes/ponds) is included in the 2008 Section 303(d) List and is attached as Appendix A. NOTE: The 2006 Section 303(d) List included considerably more smaller lakes in Appendix A. The reduction in the number of smaller lakes in the 2008 List is a result of delistings (due to the Adirondack Lake Acid Rain TMDL) and the resegmenting of smaller lakes to be included in other lake waterbody segments.

<sup>62</sup> Segment includes previously listed Little Moose Pond (P607).

<sup>63</sup> Segment includes previously listed South Pine Lake.

Water Index Number	Waterbody Name (WI/PWL ID)	County	Type	Class	Cause/Pollutant	Source	Year
<b>Part 2b - Multiple Segment/Categorical Impaired Waterbody Segments (fish consumption)</b>							
Might be addressed by a waterbody specific TMDL or a pollutant/source specific TMDL or other strategy to attain water quality standards.							
NOTE: Fish consumption advisories/impairments for all waters listed below extend into and include tributary (and downstream) waters to the first impassable barrier.

<sup>64</sup> Fish consumption advisory for Cayuga Creek includes lower Bergholtz Creek to the first impassible barrier.

<sup>65</sup> For Lake Erie and Lake Ontario Shoreline segments included on the Section 303(d) List due to fish consumption restrictions, the primary source of contamination is the open lake rather than the near-shore waters. Due to fish migration, the advisories apply to tributary waters up to the first impassible barrier.

Ont 19- 81-18-P782a thru d	* Fulton Chain Lakes, First thru Fourth Lake (0801-0373) <sup>70</sup>	Herkimer	Lake	A	DDT	Cont.Sed., Land Disp	1998

<sup>68</sup> These segments had previously been considered as one segment and listed as Eighteenmile Creek (0301-0002).

<sup>69</sup> These waters were identified as being impaired by mercury subsequent to the approval of the Northeast Regional Mercury TMDL. This TMDL specifically states that it may apply to additional waters (beyond those listed in the TMDL) subsequently identified as being impaired by mercury due to atmospheric deposition. NYSDEC is currently considering delisting these waters due to the coverage provided by the Northeast Regional Mercury TMDL.

<sup>70</sup> Previously the segment Tribs to Fulton Chain Lakes (0801-0098) which includes Gray Lake Outlet, which is suspected source of DDT contamination/fish consumption advisory in Fourth Lake, was listed for this impairment. But since the health advisory applies to the lake it is more appropriate to list the segment which includes Fourth Lake (0801-0373) with the understanding that for the purposes of Section 303(d) listing, this segment includes the lower portion of Gray Lake Outlet.

<sup>75</sup> Includes Herrick Hollow Creek for which a fish consumption advisory is in place.

<sup>76</sup> The source of the contaminants for these waters was previously listed as migratory species, reflecting the wide geographic range of striped bass and the inability to identify specific source of the pollutant. However the on-going effort to develop a New York Harbor TMDL for toxics suggests that contaminated sediments and urban runoff sources are a more appropriate characterization of these sources.

More Information Regarding Fish Consumption

Waters impaired for fish consumption are based on New York State Department of Health advisories contained in its annual *Chemicals in Sportfish and Game* publications. Because the specific extent and conditions of the advisories are reported more precisely and more frequently than can be reported through the Section 303(d) List, this advisory information regarding the support of fish consumption in New York is more timely and the extent of the advisory more precisely delineated than the information provided in the Section 303(d) List. For the most up-to-date fish consumption advisory information, refer to <http://www.health.state.ny.us/environmental/outdoors/fish/fish.htm>

<sup>77</sup> Because development of a comprehensive monitoring strategy required limiting the WI/PWL database to lakes 6.4 acres or larger, these smaller lakes are no longer tracked as individual waterbodies in the WI/PWL database.

#### More Information Regarding Shellfishing

Waters impaired for shellfishing use are based on shellfishing closures issues by New York State Department of Environmental Conservation Shellfisheries Program and the National Shellfish Sanitation Program. Because the specific extent and conditions of the closures are reported more precisely and more frequently through these programs than through the Section 303(d) List, this shellfish closure information provides better delineated and more timely information regarding the support of shellfishing use in the waters of New York than does the Section 303(d) List. For the most current shellfishing closure information, refer to <http://www.dec.state.ny.us/website/dfwmr/marine/shellfish/sfntsh/index.htm>.

	PHENOLIC COMPOUNDS <sup>79</sup>						

<sup>78</sup> Due to analytic limitations, the treatment of non-detect results in the data evaluation, and other data evaluation and quality assurance/quality control issues, additional monitoring and verification of PAHs and some Organochlorine Pesticides loadings in the river are necessary to develop a TMDL.

<sup>79</sup> Ambient monitoring concentrations of phenolic compounds in some waters of this basin occasionally exceed the current 1.0 µg/l standard for aesthetics (taste, fish tainting). However the reliability of these results is limited for much of the data set by a minimum reporting level equal to the standard of 1.0 µg/l. In addition, the frequency and/or magnitude by which this standard is exceeded was not considered in the previous (1998) Section 303(d) Listing. As a result, waters in the basin will be re-evaluated for impacts due to phenolic compounds in light of analytic capabilities and the new *Consolidated Assessment and Listing Methodology* during the next scheduled basin monitoring and assessment effort.

Other (Selected) Statewide Waters (con't)

Waters with pH between 6.0 and 6.5 or between 8.5 and 9.0.

Although New York State water quality standards state that pH shall not be less than 6.5 nor more than 8.5, there is considerable evidence that a wider range of pH is supportive of aquatic life and other uses. The NYSDEC Assessment Methodology reflects this fact by indicating that for waters with pH between 6.0 and 6.5 or between 8.5 and 9.0, waters are considered to be “stressed” but supporting of uses (i.e., not “impaired”) unless there are other indications of biological impact. As the triennial water quality standards rule-making effort moves forward, NYSDEC will evaluate the current pH standards for freshwater in light of available research and adopt a criterion that better reflects the natural range of pH in freshwaters and the resulting impact on use support. Pending the development of revised standards/criteria for pH, waters between 6.0 and 6.5 and 8.5 and 9.0 may be assessed as waters with Insufficient Data to make a determination regarding listing (Integrated Reporting Category 3).

<sup>84</sup> Impairments to these waters are being addressed by a Record of Decision and the on-going plan for remediation of the River.

<sup>85</sup> These segments were previously listed as Hudson River segments 1101-0002, 1101-0040 and 1101-0041; they have been re-segmented as reflected here.

<sup>86</sup> Impairments to these waters are being addressed by a 2005 Order on Consent with NYC directing the city to develop and implement watershed and facility plans to address CSO discharges and bring New York City waters into compliance with the Clean Water Act. This may include a revision of water quality standards based on a Use Attainability Analysis if fishable/swimmable goals of the CWA are not attainable. NYSDEC remains committed to the development of harbor-wide TMDLs for nutrients, pathogens and toxics. However, it is appropriate to defer development of separate TMDLs for these individual CSO-impacted waterbodies in light of the enforceable requirements of the NYC CSO Consent Order.

### Appendix B - Listed Waterbodies Not Meeting Dissolved Oxygen Standards, Pending Verification of Use Impairments/Pollutants/Sources

It is widely accepted that morphology and other natural conditions may contribute to periodic dissolved oxygen depletion at lower depths in significant numbers of thermally stratified waters. However bottom water conditions are not necessarily representative of the waterbody as a whole and aquatic life and other uses are often fully supported in these waters. Although NYS water quality standards may not be met at times in these waters, the USEPA policy of independent applicability allows for resolving differences in assessment results by weighing the higher quality or more representative data set more favorably in the attainment decision.

NYSDEC acknowledges that available monitoring data shows water quality standards for dissolved oxygen in many waterbodies, including 46 specific waterbodies identified by USEPA, are not met at all times/seasons or depths. However NYSDEC has not verified that specific uses of these waters are actually impaired or determined that the violation of the water quality standard is a result of factors other than natural conditions (e.g., natural lake stratification versus excess nutrient loading from human activity). While it is not practical to include a listing of all the waters that correspond to the USEPA interpretation and application of the dissolved oxygen standard for listing making decisions, the 46 waterbodies specifically identified by USEPA are listed below.<sup>93</sup>

Prior to the next listing cycle NYSDEC will include in its established monitoring and assessment program a schedule for the evaluation of whether these 46 waters are impaired in any significant manner by pollutant loadings that are from other than natural conditions. Upon verification of impairment to these waters from other than natural sources or conditions, NYSDEC will undertake the preparation of a TMDL to address the impairment, unless a TMDL or other restoration strategy plan to address the impairment is already in place or a TMDL is not needed because a single entity is the source of a significant majority of the pollutant loading that is causing the impairment - obviating the need for a load allocation among various sources.

NYSDEC will continue to evaluate its dissolved oxygen standards language in order to more appropriately reflect the impact of natural conditions and occurrence of periodic low dissolved oxygen in waters of the state. In the meantime, NYSDEC will review dissolved oxygen data in conjunction with other available data (particularly biological assessments that are more directly reflective of aquatic life use) to determine the actual level of impacts and specific causes in order to reach the most appropriate water quality assessment decisions. This approach is discussed in more detail in the *Assessment of Naturally Occurring Low Dissolved Oxygen Waters* section of the *Assessment Methodology*.

<sup>93</sup> Specific waterbodies with low dissolved oxygen from undetermined causes (natural or other) that USEPA requested be added to the Section 303(d) List: Clear Lake (0104-0057), Crystal Lake (0104-0070), Case Lake (0201-0020), Cuba Lake (0201-0016), Upper Cassadaga Lake (0202-0001), Hyde Lake (0303-0043), Lamoka Lake and Mill Pond (0502-0001), Waneta Lake (0502-0002), Lower/Upper Little York Lakes (0602-0017), Tully Lake (0602-0018), Norwich Reservoirs (0602-0010), Lake Moraine (0602-0007), Lebanon Reservoir (0602-0109), Eaton Brook Reservoir (0602-0041), Afton Lake (0601-0010), Chenango Lake (0601-0013), Young Lake (0601-0026), Weaver Lake (Maumee Swamp) (0601-0025), Otisco Lake (0702-0011), Upper Saranac Lake (1003-0048), Taylor Pond (and Mud Pond) (1004-0063), Lower Cascade/Upper Cascade/Mud Lakes (1004-0075), Putnam/North Pond (1005-0018), Lake Lauderdale, Schoolhouse Lake (1102-0011), Lake Gilead (1302-0024), Lake Gleneida (1302-0025), Lake Tonetta (1302-0014), Barger Pond (1301-0091), Copake Lake (1310-0014), Watervliet Reservoir (1311-0001), Burdens Lake (1301-0025), White/Amber Lakes (1401-0018), Swan Lake (1401-0063), Big Mohican Lake (1401-0007), Lake Huntington (1401-0008), Silver Lake Reservoir (1701-0359), Whitney Lake (1702-0101), Laurel Pond (1701-0128), Fort Pond (1701-0122), Wainscott Pond/Fairfield Pond (1701-0144), Old Town Pond (1701-0118), Agawam Lake (1701-0117), West and East Mill Ponds (1701-0026), Massapequa Lake (1701-0156), Camaans Pond (1701-0052), Milburn Pond (1701-0053).

# Impaired/DeListed Waters NOT Included on the 2008 Section 303(d) List

Water Index Number	Waterbody Name (WI/PWL ID)	County	Type	Class	Cause/Pollutant	Source	Justification
--------------------	----------------------------	--------	------	-------	-----------------	--------	---------------

## Other Impaired Waterbody Segments Not Listed Because Development of a TMDL is Not Necessary

The following waters are NOT included on the 2008 Section 303(d) List. The purpose of this supplemental list is to provide a comprehensive inventory of all waters of the state that do not fully support uses and that are considered impaired. Section 303(d) of the Clean Water Act stipulates that impaired waters that do not require a TMDL are not included on the Section 303(d) List. There are three (3) categories/justifications for not including an impaired water of the List.

Category 4a - TMDL development is not necessary because a TMDL has already been established for the segment/pollutant.

Category 4b - TMDL is not necessary because other required control measures are expected to result in restoration in a reasonable period of time.

Category 4c - TMDL is not appropriate because the sole impairment is the result of pollution, rather than a pollutant that can be allocated through a TMDL.

NOTE: Waters with pollution-related impairments that are also impaired by pollutants and are included on the Section 303(d) List are not listed here.

<sup>94</sup> Onondaga Lake previously appeared on the list of *Other Impaired Waterbody Segments Not Listed Because Development of a TMDL is Not Necessary* due to impairments from, and development of a TMDL for, ammonia and phosphorus. Subsequently the lake has been found to be meeting water quality standards for ammonia, so Onondaga Lake is considered to have been restored for this pollutant.

<sup>96</sup> The current NYS DOH fish consumption advisory is listed for Weller Pond; however there is no barrier between the lakes and Middle Saranac Lake may also be affected.

<sup>97</sup> Vermont has issued a fish consumption advisory in the Poultney River based on mercury contamination.

<sup>98</sup> This waterbody includes and was previously listed as Whipple Brook.

<sup>99</sup> The specifically identified water(s) in this segment include Clockmill Pond (P228), Rock Lake (P229), Lower Loomis Pond (P256), Middle Loomis Pond (P257), Trout Lake (P260), Chub Lake (P264), Rock Lake (P275) and Meco Lake (P276).

# Impaired/DeListed Waters NOT Included on the 2008 Section 303(d) List

Water Index Number	Waterbody Name (WI/PWL ID)	County	Type	Class	Cause/Pollutant	Source	Justification
--------------------	----------------------------	--------	------	-------	-----------------	--------	---------------

## 2008 Waterbody/Pollutant Delistings (Waters/Pollutants listed in 2006, but that are NOT included in the 2008 Section 303(d) List)

The following waterbody/pollutant listings were included on the previous (2006) Section 303(d) List, but are NOT included on the 2008 List. This list is presented in order to provide some continuity and ease of tracking waterbody/pollutant combinations across Section 303(d) listing cycles. The explanation for why these listings no longer appear in the List (e.g., delisting action, re-segmentation of the segment, etc.) is also presented below. Note: Some of these listings (those that are *Impaired*) also appear on the preceding list of *Other Impaired Waterbody Segments Not Listed Because Development of a TMDL is Not Necessary*.

Ont 158 (portion 1)	<u>Niagara River/Lake Erie Drainage Basin</u>		Niagara	River	A(S)	Chlordane	Cont.Sed, Land Disp	reassessment
	Niagara River, Lower, Main Stem (0101-0027)					pp-DDD	Cont.Sed, Land Disp	reassessment
						Octochlorostyrene	Cont.Sed, Land Disp	reassessment
						Benzo(a)anthracene	Cont.Sed, Land Disp	reassessment
Ont 158 (portion 2)	Niagara River, Upper, Main Stem (0101-0006)		Niagara	River	A(S)	Chlordane	Cont.Sed, Land Disp	reassessment
						pp-DDD	Cont.Sed, Land Disp	reassessment
						Octochlorostyrene	Cont.Sed, Land Disp	reassessment
						Benzo(a)anthracene	Cont.Sed, Land Disp	reassessment

**These 8 waters/pollutants have been delisted due to reassessment that found concentrations substantially below applicable water quality standards. Note that these pollutants were not specifically included in the 2006 List but were included within broader categories of pollutants that were listed.**

Ont 53 (portion 4)/P19a	<u>Lake Ontario (Minor Tribs) Drainage Basin</u>		Oswego	Lake(R)	C(T)	Mercury	Atmospheric Dep.	4a/2007
	Salmon River Reservoir (0303-0069)							
<b>This water has been delisted due to approval of the Northeast Regional Mercury TMDL in 2007.</b>								

Ont 74/P76	Little Sodus Bay (0302-0017)	Cayuga	Lake	B	Phosphorus	On-site WTS, Agric	4a/2007	
Ont 75/P77	Blind Sodus Bay (0302-0021)	Wayne	Lake	B	Phosphorus	On-site WTS	4a/2007	
<b>These 2 waters have been delisted due to approval of waterbody-specific TMDLs in 2007.</b>								

<u>Susquehanna River Drainage Basin</u>								
SR (portion 1)	Susquehanna River, Lower, Main Stem (0603-0016)	Tioga	River	B	Mercury	Atmospheric Dep.	4a/2007	
SR (portion 2)	Susquehanna River, Lower, Main Stem (0603-0015)	Tioga	River	C	Mercury	Atmospheric Dep.	4a/2007	
SR (portion 3)	Susquehanna River, Lower, Main Stem (0603-0013)	Tioga	River	B	Mercury	Atmospheric Dep.	4a/2007	
SR (portion 4)	Susquehanna River, Lower, Main Stem (0603-0002)	Broome	River	A	Mercury	Atmospheric Dep.	4a/2007	
SR (portion 5)	Susquehanna River, Main Stem (0601-0182)	Broome	River	A	Mercury	Atmospheric Dep.	4a/2007	
SR (portion 6)	Susquehanna River, Main Stem (0601-0040)	Broome	River	B	Mercury	Atmospheric Dep.	4a/2007	
SR (portion 7)	Susquehanna River, Main Stem (0601-0020)	Otsego	River	B	Mercury	Atmospheric Dep.	4a/2007	
SR (portion 8)/P360	Goodyear Lake (0601-0015)	Otsego	Lake	B	Mercury	Atmospheric Dep.	4a/2007	
SR (portion 9)	Susquehanna River, Upper, Main Stem (0601-0041)	Otsego	River	B	Mercury	Atmospheric Dep.	4a/2007	
SR- 44 (portion 1)	Chenango River, Lower, Main Stem (0602-0033)	Broome	River	B	Mercury	Atmospheric Dep.	4a/2007	
SR- 44 (portion 2)	Chenango River, Middle, Main Stem (0602-0009)	Chenango	River	B/C	Mercury	Atmospheric Dep.	4a/2007	
SR- 44 (portion 3)	Chenango River, Upper, Main Stem (0602-0069)	Chenango	River	B/C	Mercury	Atmospheric Dep.	4a/2007	
SR-146 (portion 1)	Unadilla River, Lower, Main Stem (0601-0003)	Chenango	River	B	Mercury	Atmospheric Dep.	4a/2007	
<b>These 13 waters have been delisted due to approval of the Northeast Regional Mercury TMDL in 2007.</b>								

# Impaired/DeListed Waters NOT Included on the 2008 Section 303(d) List

Water Index Number	Waterbody Name (WI/PWL ID)	County	Type	Class	Cause/Pollutant	Source	Justification
--------------------	----------------------------	--------	------	-------	-----------------	--------	---------------

**2008 Waterbody/Pollutant Delistings (Waters/Pollutants listed in 2006, but that are NOT included in the 2008 Section 303(d) List) (con't)**

SR- 44-14-59-34-P56	<u>Susquehanna River Drainage Basin</u> DeRuyter Res. (0602-0086)	Madison	Lake	B	Nutrients (phosphorus)	Agricultural	reassessment
	<b>This water has been delisted due to more recent assessments that indicate improved water quality and because new assessments using the NYS Consolidated Assessment and Listing Methodology indicates that these waters currently fully support recreational use and are meeting all applicable standards and assessment criteria.</b>						
Ont 66-11-P26	<u>Oswego River/Finger Lakes Drainage Basin</u> Oneida Lake (0703-0001)	Oswego	Lake	B	Nutrients (phosphorus)	Agricultural	reassessment
Ont 66-11-P26-37	Chittenango Creek (0703-0005)	Madison	River	C	Nutrients (phosphorus)	Agricultural	reassessment
	<b>These 2 waters have been delisted due to more recent assessments that indicate improved water quality and because new assessments using the NYS Consolidated Assessment and Listing Methodology indicates that these waters currently fully support recreational use and are meeting all applicable standards and assessment criteria.</b>						
Ont 66-12-12-P154 (portion 1)	Onondaga Lake, northern end (0702-0003)	Onondaga	Lake	B	Ammonia	Municipal	reassessment <sup>101</sup>
Ont 66-12-12-P154 (portion 2)	Onondaga Lake, southern end (0702-0021)	Onondaga	Lake	C	Ammonia	Municipal	reassessment <sup>101</sup>
	<b>These 2 waters/pollutants have been delisted due to recent assessments that show applicable water quality standards for ammonia are being met.</b>						
Ont 19- 81-18-17-P752..P769	<u>Black River Drainage Basin</u> Upper Sister Lake (0801-0008)	Hamilton	Lake	FP	Mercury	Atmospheric Dep.	re-segmented
	<b>This water has been delisted due to its consolidation into the Lower, Upper Sister Lakes (0801-0004) segment. This consolidated segment was subsequently delisted due to the Northeast Regional Mercury TMDL which addresses mercury impairments in both lakes.</b>						
Ont 19- 40 (portion 3)/P418	High Falls Pond (0801-0274)	Lewis	Lake	C(T)	Mercury	Atmospheric Dep.	4a/2007
Ont 19- 40 (portion 4a)	Taylorville, Elmer Falls Ponds (0801-0276)	Lewis	Lake	C(T)	Mercury	Atmospheric Dep.	4a/2007
Ont 19- 40 (portion 5)/P426	Effley Falls Reservoir (0801-0172)	Lewis	Lake(R)	C(T)	Mercury	Atmospheric Dep.	4a/2007
Ont 19- 40 (portion 7)/P434,P431	Soft Maple Reservoir, Soft Maple Pond (0801-0173)	Lewis	Lake	C(T)	Mercury	Atmospheric Dep.	4a/2007
Ont 19- 40 (portion 9)/P449	Beaver Lake, Beaver Meadow Pond (0801-0174)	Lewis	Lake	C(T)	Mercury	Atmospheric Dep.	4a/2007
Ont 19- 40 (portion 11)/P478	Moshier Reservoir (0801-0194)	Herkimer	Lake(R)	C(T)	Mercury	Atmospheric Dep.	4a/2007
Ont 19- 40-20-P473, P474	Sunday Lake, Sunday Creek Reservoir (0801-0195)	Herkimer	Lake	C(T)	Mercury	Atmospheric Dep.	4a/2007
Ont 19- 40-P449-2-P450-2-P451	Francis Lake (0801-0192)	Lewis	Lake	C(T)	Mercury	Atmospheric Dep.	4a/2007
Ont 19- 40-P493	Stillwater Reservoir (0801-0184)	Herkimer	Lake(R)	C(T)	Mercury	Atmospheric Dep.	4a/2007
Ont 19- 57- 7-P619,P622,625	Cleveland,Payne,Huckleberry, Halfmoon Lks (0801-0193)	Lewis	Lake	C	Mercury	Atmospheric Dep.	4a/2007
Ont 19- 81-18-17-P750	Dart Lake (0801-0242)	Herkimer	Lake	A	Mercury	Atmospheric Dep.	4a/2007
Ont 19- 81-18-17-P752	Big Moose Lake (0801-0035)	Herkimer	Lake	A(T)	Mercury	Atmospheric Dep.	4a/2007
Ont 19- 81-18-17-P752..P768,P769	Lower, Upper Sister Lake (0801-0004)	Hamilton	Lake	C(T)	Mercury	Atmospheric Dep.	4a/2007
Ont 19- 81-18-17-P752- 8-P774	Russian Lake (0801-0006)	Hamilton	Lake	C	Mercury	Atmospheric Dep.	4a/2007
Ont 19-P1007	North Lake (0801-0451)	Herkimer	Lake	A(T)	Mercury	Atmospheric Dep.	4a/2007
	<b>These 15 waters have been delisted due to approval of the Northeast Regional Mercury TMDL in 2007.</b>						

<sup>101</sup> These waterbodies were previously included as impaired but not requiring TMDL development in the 2006 Section 303(d) List because a TMDL for ammonia in Onondaga Lake was completed in 1998.
